

THE FLYING BEETLE GLASS CUTTER

by Creator's Stained Glass

Features:

- designed for use with the Beetle Bit Glass Cutting System
- glides effortlessly back and forth on the straight-edge bar
- made from impact resistant polycarbonate
- does not require oil, though cutting head may be dipped if desired

Description of use:

The cutting head is always at a perfect 90 degree angle to the glass, giving you a perfect score every time. All you need to do is press down on the button to engage the carbide cutting wheel with the glass. The brightly colored pointer is in direct alignment with the lines of The Waffle Grid (also by Creator's Stained Glass) so you will know exactly where the score line is going to be.

Replacement heads are available as the Toyo TC-10.
